

## Homes.com Rebound Report Property Data through May 2013

### Indications: More than a Third of Top 100 Regional Markets Continue Significant Rebound

A useful way to understand how the housing recovery or rebound process is unfolding across the country is to measure how far each market has recovered from its peak-to-trough decline in index value. An analysis such as this is logical because a similar boom-bust scenario played out across virtually every market in the country during the 2000s, and today they are in some stage of rebound. The Homes.com Rebound Report uses the Homes.com Local Market Index data back to 2000, but it focuses on the period from 2005 forward when identifying peaks and troughs to isolate the impacts of the [Great Recession](#), a recently marked global economic decline that also correlated with the bursting of the U.S. housing bubble. The following table shows the Top 10 and Bottom 10 markets for May 2013 based on their rebound. A value of 100% or higher for a market means that the area has fully recovered any price decline as a result of the recession.

| Homes.com Local Market Index         |         | Rebound Report - Top and Bottom Markets  |         |
|--------------------------------------|---------|--|---------|
| Top 10 Metro Area                    | Rebound | Bottom 10 Metro Area                     | Rebound |
| San Antonio - New Braunfels, TX      | 227.20% | Cape Coral-Fort Myers, FL                | 13.16%  |
| Houston - Sugar Land - Baytown, TX   | 217.98% | Modesto, CA                              | 12.40%  |
| Austin - Round Rock - San Marcos, TX | 214.38% | Bridgeport-Stamford-Norwalk, CT          | 12.05%  |
| Dallas-Fort Worth-Arlington, TX      | 211.60% | Stockton, CA                             | 11.89%  |
| Oklahoma City, OK                    | 206.98% | Palm Bay-Melbourne-Titusville, FL        | 11.45%  |
| Tulsa, OK                            | 194.08% | Las Vegas-Paradise, NV                   | 11.29%  |
| McAllen-Edinburg-Mission, TX         | 179.24% | Orlando-Kissimmee-Sanford, FL            | 11.14%  |
| Pittsburgh, PA                       | 135.04% | New Haven-Milford, CT                    | 10.73%  |
| El Paso, TX                          | 129.28% | Lakeland-Winter Haven, FL                | 10.26%  |
| Omaha-Council Bluffs, NE-IA          | 122.44% | Providence-New Bedford-Fall River, RI-MA | 6.81%   |

\*Rebound is a measurement of the percent retracement of the peak-to-trough decline attributable to the Great Recession.

In this latest report, 16 out of the 100 markets measured show a complete price recovery from the peak-to-trough decline amount attributable to the housing bubble – up from the 14 that showed full recovery in last month’s report. Six of these markets again belong to the state of Texas, and two belong to Oklahoma, illustrating that the rebound continues to show strength in the South. 38 markets showed more than a 50% rebound – up from the 35 in last month’s report.

The metro areas in the bottom of the rebound category tend to be in markets that had some of the highest peak-to-trough changes. Although the change is positive, the rebound is slow indicating higher inventories may exist in these areas.

The following graph shows the top 10 markets based on rebound of peak to trough.
